The former National Security Adviser, John Brennan and his deputy, Ben Rhodes, have been charged with false statements of fact during their public appearances. These alleged false statements concern a long-held alleged conspiracy between a group of (mostly) Russian intelligence assets and the highest echelons of the US Government. The publication of this case on Monday has sparked a new wave of conspiratorial accusations against the US Government by alt-right bloggers, led by the conspiracy theorist, Alex Jones. They claim that the narrative put forth by the FBI and Department of Justice are inaccurate and represent a perverted and illegal plot to frame Russia as the new threat to US democracy.

These allegations, presented by the alt-right, have been harshly criticized by the more mainstream conservative camp of sites like The National Review. These critics have suggested that the conspiracy theories are not only without empirical basis, they represent an unsustainable and dangerous legitimization of conspiracy theorists. Some of these observers continue to argue that the many flaws in the indictment, and the politicized and exclusionary language of the FBI investigation itself, mean that the case is largely devoid of evidence. Others have suggested that the indictment appears to be an overreach of executive authority and Congress (via Obama's recent executive order) should rectify these oversteps. The criticisms of the indictment have been fascinating to observe. Even among the more mainstream conservatives, the "deep state" allegations have been vigorously denied by right-wing leaders and their commentators who argue that these accusations are part of a larger Clinton campaign conspiracy against Trump. Along these lines, some have added that even if these allegations are true, the fact that they happened now, and against alleged perpetrators who have been previously cleared,
